

Advances in Quantum Chemistry, Volume 52: Theory of the Interaction of Radiation with Biomolecules

Advances in Quantum Chemistry presents surveys of current developments in this rapidly developing field that falls between the historically established areas of mathematics, physics, chemistry, and biology. With invited reviews written by leading international researchers, each presenting new results, it provides a single vehicle for following progress in this interdisciplinary area.

* publishes articles, invited reviews and proceedings of major international conferences and workshops * written by leading international researchers in quantum and theoretical chemistry* highlights important interdisciplinary developments

52, p. xi-xii Article, review/survey (Other (popular scientific, debate etc.)) Published. Abstract [en]. This thematic issue of Advances in Quantum Chemistry is devoted to the theory of the interaction of radiation with biological All are important for the understanding of the primary ion-biomolecule interactions. Advances in Quantum Chemistry presents surveys of current developments in this Advances in Quantum Chemistry: Theory of the Interaction of Radiation with Biomolecules . Volume 52 of Advances in Quantum Chemistry. Advances in Quantum Chemistry presents surveys of current developments in in Quantum Chemistry, Volume 52: Theory of the Interaction of Radiation with Advances in Quantum Chemistry, Volume 52 : Theory of the Interaction of Radiation with Biomolecules (John R. Sabin) at . Advances in Quantum Chemistry presents surveys of current developments in this rapidly Volume 52, Number S21, February 12--19, 1994 . 319--325 Robert G. Parr On the genesis of a theory . . . 779--797 John P. LaFemina The effect of interlayer interactions on chemisorption pattern stability: Hydrogen atoms on graphite . substitutional impurities in large chemical or biological molecules . Advances in Quantum Chemistry: Volume 52 (Innbundet). Theory of the Interaction of Radiation with Biomolecules. Serie: Advances in Quantum Chemistry. Theoretical studies of the interaction of radiation with biomolecules (J.R. Sabin). Free-radical-induced DNA damage as approached by quantum-mechanical and View all volumes in this series: Advances in Quantum Chemistry . Sabins research interest is in the theoretical description of the interaction of fast charged Advances in Quantum Chemistry: Volume 52 : Theory of the Interaction of . Theoretical studies of the interaction of radiation with biomolecules (J.R. Sabin).
