

A lively text and captivating images tell the story of the ever-curious boy who grew up to make one of the most significant discoveries of our time. From the time Charles Darwin was a boy, he was happiest when he was out alone collecting specimens (especially beetles). And despite his father's efforts to turn young Darwin — a poor student — into a doctor or clergyman, the born naturalist jumped instead at the chance to sail around South America, observing and collecting flora and fauna all the way. In a clear, engaging narration, Kathryn Lasky takes readers along on Darwin's journey, from his discovery of seashells on mountaintops that revealed geological changes to his observations of variations in plants and animals, suggesting that all living things are evolving over time. Matthew Trueman's striking mixed-media illustrations include actual objects found in nature, enhancing this compelling look at the man behind the bold theory that would change the way we think about the world — and ourselves.

Going for Gold (Somersaults and Dreams), Legends of Soul - Ray Charles, Cheetahs (Living in the Wild: Big Cats), John Steinbeck: A Biography, Inorganic Ion Exchangers in Chemical Analysis, Product Development: Meeting the Challenge of the Design-Marketing Interface, Have I Got a Book for You!, Farm Motors; Steam and Gas Engines, Hydraulic and Electric Motors: Windmills (Classic Reprint), Lets Look at Leopards (Rosen Real Readers: Upper Emergent),
